They are elegant, light, easy and durable.

Please to call for a sample, or to see them, or to obtain the price, address the owner.

Editor Leader.—ARTHUR A. PARLIN, Mr. B. Parlin, of this place, left home last Friday in the forenoon, and has not since returned. This disappearance has created great anxiety in this community. Nothing reliable has been heard from him since about 9 o'clock on Friday, an hour and a half after he left home, though a general search has been made by our citizens. He was 10 years of age, but would not seem to be older than 16; was small, of light complexion, rather light sandy hair. He wore a brown mixed Tweeds coat—brown mixed cashmere pants—black striped sailor's satin vest—a gray hat—old pair calico boots.

It is feared that he has suddenly become disengaged, been in delicate health for two years past, and being in the habit of always informing his parents of his intentions on leaving home.

By noticing this disappearance you will confer a great favor upon his parents and friends.

Yours,

J. O. CONVERSE.

THE ST. CLAIR STREET IMPROVEMENT.—This improvement is progressing rapidly. A large number of double teams are employed in conveying gravel to the street; and so far as the work is finished, it has been done according to the new survey. The center of the street has been raised to a proper height, leaving suitable drains on each side of it to carry off the refuse water into the lake by sewers. The graveling is completed at different points between Erie street and Collamer, and the other portions will speedily be put in good condition if the present fine weather should continue—perhaps by the latter part of August. Some of the new road between the city limits and Collamer is level as a floor, and hard and substantial. Toll-gates will soon be erected, and a rate of tolls established to pay the expense of keeping the road in good order, and if possible return the stockholders a dividend as interest on the monies invested in the enterprise. In addition to the pleasure of riding over a smooth road, the improvement will be of the greatest benefit to the property about there, and will doubtless enhance its value materially. On each side of this road in the city, the sidewalks are graded to correspond with the grade of the street, and if we are not wrongly informed, are to be repaired, commencing at Erie street.

This road is a direct one to Collamer, running through some portions of the country not on the road before, and shortens the distance to that place very greatly.—Collamer now being distant from Cleveland only about six and a half miles.

1st. Cotton is used as it is purchased—on spools without re-winding; saving time, trouble and waste.

2d. The trouble and perplexity of filling a shuttle, (as in other machines,) is in this avoided; no shuttle is employed, the under thread being used from a large spool.

3d. It is very simple yet strong in construction, easily learned and kept in order, and does not require to be taken apart to be oiled.

4th. The stitch is always distinct, even and regular, and will not rip though every fourth stitch be cut.

5th. The stitch is as elastic as the most elastic fabric.

This machine embroiders beautifully.

Ladies and others interested in the saving of labor are invited to call at the saloon room of the subscriber and examine for themselves. The above machines are freely shown and samples of work given at all times.

The services of a lady and the use of a machine can be obtained by the day in families, by calling at the room of Mr. Hopkins. Terms \$1.50 per day.

SAMUEL HOWE,
